[Forget your password?](#)

It should be static login from the table below

Forget Password

Email

Submit

*Check if the email exist in the User table
If the email found then send the Password to that email
If email NOT found then Error message

Main dashboard

Customers

Add New					
ID	Name	Address	City	Notes	Action
1	Customer 1	addd	Lahore		Edit Delete
2	Customer 2	addd	Multan		Edit Delete
3	Customer 3	addd	Karachi		Edit Delete
4	Customer 4	addd	Lahore		Edit Delete
5	Customer 5	addd	Sailkot		Edit Delete

Add button
This will open a page on which user can define all the files in this table
Remember the City is a seperate table and you need to save city_id and

Edit button
This will open same for as above but it should be in the Popup and using AJAX and it should update the table using AJAX

Delete button
This button will delete the row and it should be remove using AJAX after confirmation message.

Load all the data from Customers table

Database (3 Tables)
